

The Facts

Every year thousands of innocent individuals and companies are victims of identity fraud. Identity fraud is on the increase, costing the UK economy over a billion pounds a year, and rising. Under current legislation the careless disposal of certain types of material could leave you facing severe penalties.

Make Sure Your Details are Safe & Secure

The Solution

The most effective and efficient way to protect yourselves is to shred all material of high importance. Shredders are an ideal solution for disposing both excess paper and the safe disposal of confidential information such as personal and financial details, including bank statements and credit card slips.

Shredders are available in a choice of security levels, sizes and capabilities. With this in mind, please consider the following important factors when selecting a shredder for the home/home office or workplace environment. This will ensure your purchase suits your individual or business needs:

- What material will be shredded (CDs, Paper etc?)
- How much paper will be destroyed per day?
- What bin size do you need?
- Do you want a shredder by your desk?
- Where will the shredder fit in the office?

Strip Cut Machines

Provide conventional security by shredding paper into unreadable strips

Cross Cut Machines

Shred paper into small, unreadable pieces. They also significantly reduce bulk waste

How Does A Shredder Work?

For security purposes, the cutting system of a shredder comes in two versions:

Strip Cut:

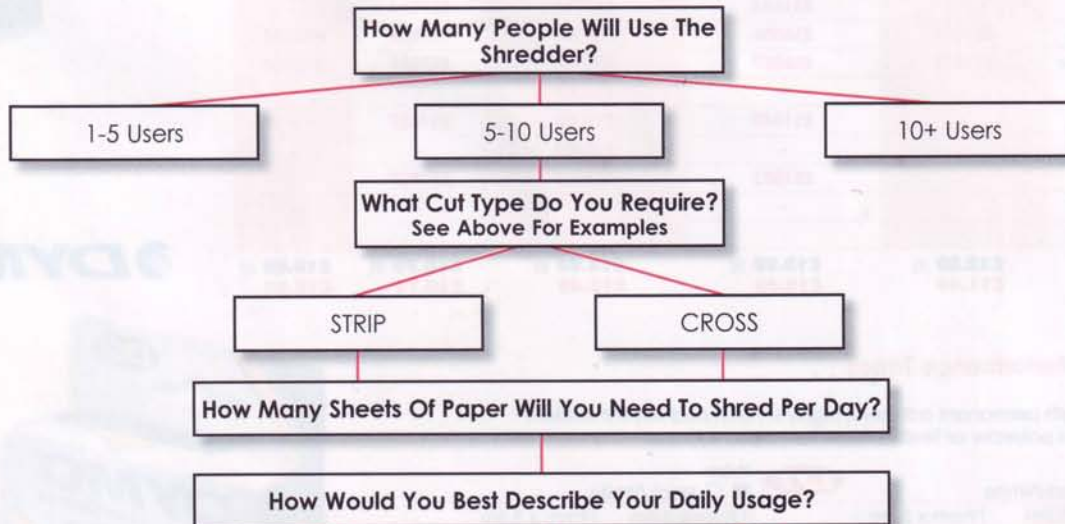

The strip cut model provides conventional security by shredding paper into long unreadable pieces for general documents. These machines shred the paper into two directions – down and across.

Cross Cut:

The cross cut model shreds paper into small unreadable pieces (like confetti), providing higher levels of security and reducing the output of waste. The cross cut version should be used for highly sensitive documents.

Helping You To Choose A Shredder

In today's ever changing marketplace, there is a wide range of shredders available, please see below for help on how to choose your shredder and what category our ranges of shredders fall into.

LIGHT DUTY
(Personal Shredders)

- Designed for light duty
- Compact, lightweight design
- Normally 10-20 uses per day
- Takes up to 250 sheets

Examples are:
FE9415 Fellowes P600C-2 Shredder (see p.82)
HM0036 HSM 102.2 Shredder (see p.79)
AR0773 Rexel V25 Shredder (see p.80)

MEDIUM DUTY
(Office Shredders)

- For home or general office use, for larger departments
- Durable, contemporary design
- Normally 25-50 uses per day
- Takes up to 600 sheets

Examples are:
FE0016 Fellowes PS65C Shredder (see p.82)
HM0011 HSM 225 Shredder (see p.79)
AR0456 Rexel P185 Shredder (see p.80)

HEAVY DUTY
(Professional Shredders)

- High volume shredders for regular office use
- Ideal for the workplace environment
- Normally 50-100 uses per day
- Takes up to 1500 sheets

Examples are:
FE9417 Fellowes PS80C-2 Shredder (see p.82)
HM0009 HSM 390 Shredder (see p.79)
AR0524 Rexel 1400/S5 Shredder (see p.81)
